PROFESSIONAL SUMMARY

MIS and IT Operations professional with hands-on experience in Excel MIS reporting, Power BI dashboards, and data-driven decision-making. At SLnko Energy, built automated reporting systems improving accuracy by 15% and delivered 80+ structured DPRs over a 6-month tenure. Applied analytics to track performance metrics and support operational reporting across functions. MBA in Operations & IT (2026). Seeking MIS / Data Analyst roles.

TECHNICAL SKILLS

- **Reporting & MIS:** Advanced Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, Macros, Dashboards) · MIS Automation · KPI Reporting · Data Validation · Data Cleaning · Google Sheets
- **Data Visualisation:** Power BI (DAX, Data Modeling, Power Query, EY Certified) · KPI Dashboards · Process Improvement
- **Tools & Platforms:** MS Office Suite · ERP (Documentation & Reporting) · SQL (SELECT, JOINS, GROUP BY, Subqueries – MySQL Workbench) · PVSyst Report Analysis
- **Soft Skills:** Stakeholder Management · Cross-functional Collaboration · Analytical Thinking · Problem Solving

EXPERIENCE

SLnko Energy

Backend IT Operations & MIS Trainee

Sep 2025 – Feb 2026

Noida

- Prepared 80+ DPRs and EPC reports integrating PVSyst simulation data, BOQ, cost estimates, and project schedules for MW-scale solar plants – ensuring documentation accuracy and version control across all project approvals
- Built automated Excel MIS dashboards with reporting workflows, improving backend reporting accuracy by 15% and reducing manual errors in cross-team reviews
- Standardised reporting templates and data formats across engineering, finance, and operations – enabling consistent, structured data for management decision-making
- Coordinated with cross-functional teams to collect project inputs and deliver structured reports on time for senior management review

PROJECTS

Solar Plant DPR Reporting System | Excel, Power BI

2025

- Designed a standardised Excel template for DPR compilation covering PVSyst outputs, plant specs, costing, and timelines – used across 80+ solar project reports, eliminating inconsistent ad-hoc formats
- Built a Power BI dashboard (DAX, Power Query) for project-wise cost, capacity, and schedule tracking across multiple MW-scale plants

Business KPI Dashboard | Power BI, Excel | prince-srivastav.github.io/Portfolio

2024

- Designed an interactive Power BI dashboard (DAX, data modelling, relationships) for business KPI visualisation as part of MBA coursework
